

THE NEW DIMENSION -

NOT ONLY FOR THIN PLATES

Step Switch Controlled MIG/MAG Welding Machine SATURN Serial

- **SATURN 250 MIG**
250A/30%; 12 steps
- **SATURN 300 MIG**
300A/30%; 15 steps

gas cooled , compact

Step Switch Controlled MIG/MAG Welding Machine SATURN Serial

- **Ergonomic, compact and robust type of construction.**
- **Outstanding welding characteristics:**
 - Improved welding choke with 2 taps,
 - 4-rolls wire feed system with big rolls
- **Ideal working in field**
 - 4 crane eyes for flexible craning, big steering and truss rolls
 - Low central of gravity for high security against tipping over
 - Protection classification IP23
- **Highest security during operation**
 - Overcharging protection in the transformer and rectifier
 - Electronic controls integrated in a dust free area, modular construction
- **Flexibel: alternative control variations for all applications:**
 - M201 PROGRAM: 24 welding jobs, one-button operation
Options: wire correction on the torch or on the remote control, push/pull operation, intermediate wire feed unit, welding data recording
 - M100: two-button operation
 - M110 (Option): V/A - meter with hold function

Step Switch Controlled MIG/MAG Welding Machine SATURN Serial

- Production- and repair work of simple welding tasks up to high tech applications in industry and craft i.e.
 - For maintenance of works
 - Repair services of vehicles and agricultural machinery
 - Production of control units and ventilation systems
 - Steel building and mechanical engineering
 - Assembling and fixing in the production etc.
